A motor which fell at Morgan attracted the attention of those who were fortunate enough to be up until midnight last night last week. The motor fell from south to north, describing an arched curve of much beauty. Some of the observers said that a sharp hissing like that of a sky rocket accompanied the flight of the star.

Great interest is being shown in the Elasticsearch to be held in St. George in October next, and already Secretary Alfred M. Durkin has received a large number of letters of inquiry bearing upon the subject. The prizes offered for the rendition of the various selections are liberal. PRICE OF MEXICAN SILVER.

Exchange, London, Aug. 17.—The South American.

City of Mexico, Aug. 17.—Exchange on New York from London. The price drop in silver to 111, and in some cases 110 was asked. Banks were in doubt as to what rate to make in view of the condition of the silver market. Gold tags were nominal. Exchange on London was 20/- On London, gold and silver were in demand, but the government was meeting the interest on the sterling debt at the rate of 22.5 cents per annum.

The government can meet this liability by economic and using the surplus funds, but banks know the time will come when something must be done, and the debt should pay a rate of interest of more than 22.5 cent and also that Mexico is entitled to receive a share of the interest payment of the gold. Interest rates being increased.

It is not denied that a very serious financial crisis is at hand, but the people have come to expect a still further decline in the value of silver, and some predict it will be forced to a point where the dollar will be worth as much as gold.

The wells will be twenty to thirty feet in diameter, with an average depth of 200 feet, at a probable cost of \$10 per foot. In addition to this expense, upward of \$30,000 will be expended in the construction of flumes, tunnels and gold-dressing plants. W. W. House, now sinking the artesian well at Old Mine, will help the district in view of the purpose of holding on the work.

SENATOR TELLER AT HOME.

He is Stromed in Constitution of the Mexican Republic.

Bonanza, Aug. 17.—Senator Teller has arrived here and intends to remain in Colorado until fall. In an interview he expressed himself as strongly opposed to a combination of the silver Republicans with Mexican Republicans in Colorado this fall, on the money question in 1892.

He is the present undoubtedly of the administration towards the greenback and currency notes and prefers a system by which the national banks will be authorized to issue all paper money. Under such there will be no certain standard, but bank notes will be issued.

The administration will have succeeded in making gold the only

standard.

The article commences on the "charteristic crudeness and boldness of American diplomacy in sending a metallic commission to effect a temporary of the Indian mints while at the same time dealing the worst possible blow to British commerce by passing the Tolley tariff."

It is clearly impossible to treat seriously a commission which appears that way and do something for silver, the United States will send Mr. Bryan to the White House, to the lasting injury of Britain.

It is not certain that Mr. Bryan will be elected. It is not even certain that if he were elected we would suffer more than we should but a new McKinley with another McKinley act.

Moreover, British interests in American securities have time before the next presidential election and before the census, to get rid of them.

One thing is certain, we would be very foolish to do anything for silver. We should the United States and France agree to adopt bimetallism and England to reopen the India mints would only bolster up silver for a while longer to fall again to its proper market price, so that Indian business would be in a position as bad, if not worse than before.

Assessment of Sheep.

Bowling Green, Ky., Aug. 17.—The board of assessment has sent the sheriff of Adair County to Custer to get the abstract of the assessment roll of that county.

The members of the board will have been absent looking up the names of the assessment of sheep have all returned. Deputy Auditor Terence Tamm with State Auditor Anderson from Bannister. He states that the abstract of assessment shows a correct number of sheep for that county. The sheep which it has been supposed are dead there, be says, are grazed in Pendleton State Auditor Stover who has been to Bingham to look into the matter of the same opinion.

He states that the action of the state board has had the effect of stirring up the officials there, and the assessment has gone out to stand up to the sheep. Stover thinks from 100,000 to 120,000 will be found.

The state, he says, will get its proportion of taxes, but the question of fixing the total assessment of the county for the purpose of making the state apportionment of taxes is one that does not seem to be any solution of, so that apprehension must be made now.
